**APPLICATIONS ENGINEER FOR THE NORTH**

**Svantek UK**, manufacturer of noise and vibration instrumentation for environmental and health & safety analysis and monitoring applications, has divided its sales team into two distinct territories. Aaron Priestley joins as

applications engineer for the North.

His appointment follows the recent addition of Matthew Lunn as Svantek UK's applications engineer

covering the South, and the promotion of Aidan Hubbard to sales manager.

Paul Rubens, general manager, says: "Svantek UK's continued growth has made it increasingly evident that a geographical split of the sales function was the best way forward to ensure renewed focus on individual territories. Aaron's calibre and background make him a great addition to the team and will help further strengthen customer relationships for Svantek UK in the North."

**AVDANZER ACHIEVES TOP SAFETY ACCREDITATION**

**AVDanzer** manufactures modular buildings and hires site accommodation units to many of the UK's construction companies. It has been awarded accreditation from Alcumus SafeContractor for achieving excellence in health and safety in the workplace.

Alcumus SafeContractor is a third-party accreditation scheme which recognises rigorous standards in health and safety management amongst contractors. It is used by many organisations in the UK including SMEs and FTSE 100 companies.

AVDanzer's health and safety advisor, Gary Duckworth says: "SafeContractor accreditation provides us with a uniform standard across the business and is a statement of our commitment to achieve the highest possible standards of care. We have invested through recruitment and training to ensure our health and safety standards are second to none and this is further acknowledgement that we take our responsibility extremely seriously."

**AWARD WINNER**

The **Hughes** Zero Power Cooler for emergency tank showers has won the Energy Industry Council (EIC) award for Innovation. It was also a finalist in the categories Technology and Collaboration.

The award ceremony in London celebrated the successes of EIC Member companies through the Survive and Thrive Awards.

The passive cooling system for emergency tank showers was designed and developed in

collaboration with Celantel. The Hughes Zero Power Cooler requires no power, maintenance or servicing. Night-time ambient temperature is used to maintain the daytime temperature of the water, ensuring delivery of safe and tepid water.

A tank shower fitted with this cooler can be sited in areas that do not have a reliable power source or water supply, such as well-heads or new exploration sites.

**PROXIMITY WARNING SYSTEMS**

October 2019 marks the 10 year anniversary of SiteZone Safety. Originally known as OnGrade, SiteZone Safety's primary objective is to prevent workers from succumbing to work-related collision incidents with vehicles and plant.

SiteZone Safety's most well-known offering is the SiteZone RFID proximity warning system. This has evolved into a suite of proximity warning products that cater to clients' various collision risk demands.

The range includes SiteZone iNstant, a wireless RFID PWS;

Dumper Advance, a robust RFID PWS for forward tipping dumpers, with flexible exclusion zone capability; BucketZone, for extendable machine parts which may accidentally strike personnel; OverSite, the telematic function, which captures data from SiteZone to be used as a safety monitoring and benchmarking tool for managers; and patent-pending SmartBubble, that uses a range of technologies to increase the efficacy of the SiteZone system on site.

**TILLER ARM SUCCESS**

**Combilift** added yet another award to its tally when it won the Industrial Vehicles Category of this year's BITA (British Industrial Truck Association) Design4Safety Awards.

The company's reputation for designing innovative products and features to enhance safety in the materials handling sector was underlined once again with the success of its patented multi-position tiller arm, which is a feature common to all its pedestrian models.

Originally designed for the Combi-WR reach stacker, the tiller arm is now incorporated on Combilift's ever growing range of pedestrian models such as the multidirectional Combi-WR4, the Combi-CS counterbalance stacker and the Combi-PPT powered pallet truck.

**RRC INTERNATIONAL**

**GOLD PARTNER STATUS**

NEBOSH has introduced a Learning Partner Programme which recognises those partners that provide the best possible learning experience. **RRC** is a NEBOSH Gold Learning Partner, the highest level in the programme.

The Learning Partner programme ensures all NEBOSH learners have a positive learning experience and helps to make choosing a Learning Partner easier. RRC is committed to continually improving its learner experience – through face-to-face, online, blended learning and in-company training.

Gary Fallaize, RRC MD, says: "We value our long term partnership with NEBOSH, and receiving Gold Learning Partner status reflects the dedication and excellence RRC continues to maintain in order to provide learners with the best learning experience. Every learner matters and can make a positive difference to health, safety and the environment in the workplace."
